Professional Summary

Computer Science student focused on making simple and user-friendly software full-stack web development using React, Laravel, and the MERN stack. Experienced in building practical applications with frontend interfaces, backend APIs, and database integration. Contributed to CIIT SHOP, a recognized student organization portal, and received the CIITzen Trailblazer Award for improving their receipt system. Seeking a full-stack development internship to apply my skills to real-world projects.

Technical Skills

Programming Languages

- JavaScript
- TypeScript
- Python
- PHP
- Java
- C#
- Dart

Frontend Development

- HTML5
- CSS3
- React
- Tailwind CSS
- Bootstrap

Backend Development

- Laravel
- Node.js
- Express.js
- REST API Design
- CRUD Operations

Databases

- MongoDB
- Microsoft SQL Server

Development Tools & Platforms

- Git
- GitHub
- Vercel
- Figma
- Asana
- Google Colab
- Android Studio

Additional Technologies

- Flutter
- Selenium

Development Practices

- Agile Development
- Version Control
- Git Workflows

Projects

E-Commerce Website for Manufacturing Products

- MERN e-commerce site with JWT auth, catalog/search, cart/checkout. Tech: MongoDB, Express, React, Node, JWT

Repository: github.com/yuyuyu-226/Student-Task-Tracker

GCoins

- Flutter finance app inspired by GCash, with transfers, balances, and history; uses MongoDB. Tech: Flutter, Dart, MongoDB, REST

Repository: github.com/kirkbesa/flutter_finals

Stockly

- Python/Streamlit stock predictor using ML, Pandas, Matplotlib. Tech: Python, Streamlit, Pandas, Scikit-learn, Matplotlib.

Repository: github.com/jarelltamonte/stockly

Education

CIIT College of Innovation and Integrated Technology
Bachelor of Science in Computer Science 2022–Present | Quezon City, Philippines

Certifications

- Introduction to Cybersecurity — Cisco, 2024
- Cybersecurity Fundamentals — IBM SkillsBuild, 2024

Achievements

CIITzen Trailblazer Award | CIIT's Sales Handling for Organizations Portal (CIIT SHOP)

- Contributed to the development of CIIT SHOP, a portal designed to streamline sales and receipt handling for student organizations
- Helped solve inefficient receipt system problems faced by student organizations
- Received recognition for project contributions and documentation work
- Collaborated with a 5-member team to deliver a working solution tested during a campus event
